## BONDING LIQUID

IG00

NEO Bonding Liquid is a unique, water-based, penetrating, bonding and stabilizing liquid/sealer for interior and exterior use on powdery, friable and very porous new and weathered substrates such as limewash, old paint, new friable or porous plaster and fillers. Once the NEO Bonding Liquid has done its job these areas can be over-coated with a range of NEO Paints' water and solvent based decorative products.

NB: This product was previously known as NEO Isoliergrund.

### Product Data

Resin Base	Synthetic polymer resin emulsion
Drying Time	Touch dry: 30-45 minutes Hard dry: 2-3 hours
Solid Matter by Content	By volume: 9,7% By mass: 10,3%
Film Thickness	± 20 microns
Surface Appearance	Not applicable – product should penetrate completely into substrate.
